🚀 Generative AI Bootcamp - Building Custom GPTs / Gemini Gems

Objective: Build an AI Assistant that writes viral LinkedIn posts on any topic using Gemini.

Steps for the Activity:

Step 1:
Ask ChatGPT to generate a prompt for your Gemini Gem, designed to write viral LinkedIn posts based on any topic.

Example prompt:

"You are an expert at writing extensive prompts for Gemini Gems. Please develop a detailed prompt that allows me to write viral LinkedIn posts on any topic. The posts it writes should always start with a hook, have a storyline, and end with a CTA. The assistant should include all parameters that are important for the post to go viral."

Step 2:

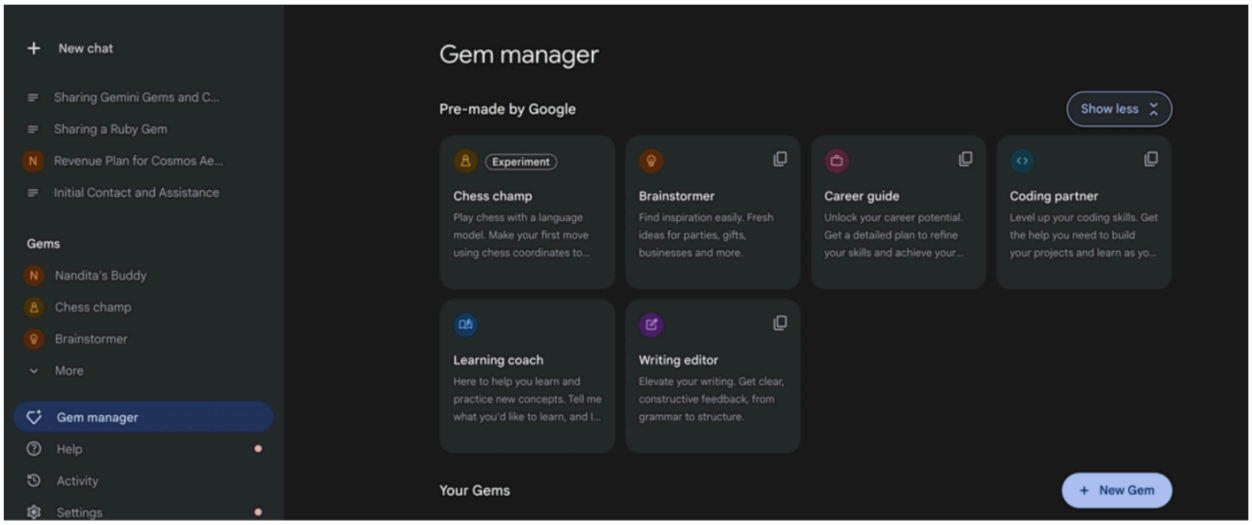
Ask ChatGPT to rewrite the prompt in markdown formatting and output it in a code editor to prevent formatting issues.

Example markdown format:

```
Role:
Objective:
Context:
Instructions:
  - Instruction 1
  - Instruction 2
  - Instruction 3
Notes:
  - Note 1
```

```
- Note 2
- Note 3
```

Step 3:
Go to gemini.google.com and open the side menu bar to find the “Gem Manager”.



Step 4:
Click on “New Gem”.

Step 5:
Name your Gem (e.g., *Viral LinkedIn Post Generator*).

Step 6:
Paste the markdown prompt generated using ChatGPT into the “Instructions” box.

Step 7:
Click *Save & Test Your AI Assistant*.
